Affairs of the District

The Burning of Refuse on the Brentwood Dump.

A Difficult Matter for Street Cleaning Department to Control—Plumbing in a Hospital Annex—Publication of Police Regulations.

Warner Statler, Superintendent of the Street Cleaning Department, has submitted to the Commissioners a statement relative to the nuisance caused by the burning of refuse on the dump near the Brentwood Road north of Florida Avenue. It will be recalled that the smoke arising from this dump was recently made the subject of complaint on the part of Ruth G. D. Haynes, Mr. Statler's daughter.

The matter referred to in the communication was investigated by one of our inspectors, and it was found that the fire was on the dump on the Brentwood Road north of Florida Avenue. From the information obtained it appears that the fire was started about 5 o'clock p. m., after the hours of the man in charge of the dump, by private parties hauling refuse from business houses. It is against the orders of this department to deposit combustible material on any of the dumps, but in view of the present system of collecting from business houses it is possible for the department to prevent such deposits after the dumpman has left for the day.

It is hoped that the estimate submitted for the collection and disposal of such material from business places will be allowed at the coming session of Congress, and, if it is, the difficulty will be controlled. The fire in question is under control, and we will do our utmost to prevent a recurrence of the conditions complained of.

Sister M. Pauline, of the Georgetown University Hospital, recently requested that the running trap and fresh air inlet in connection with the hospital annex, now being built, be omitted. The ground of the request was that the house is isolated from the hospital and is on high and open space.

The application was referred to the

Plumbing Department, and Charles B. Ball, the Inspector of Plumbing, has submitted to the Commissioners the following statement relative to the matter:

"The building referred to in this application is a two-story brick dwelling, to be used as an annex to the larger hospital building, adjacent to the main building. The main reason for wishing to omit the running trap appears to be to avoid possible obstructions in this appendage. The use of the building for hospital purposes appears to me to be such, if there is any question of communicating disease germs through the public sewer from one house to another, that certain precautions such as are insured in the use of a running trap should be observed.

"Under the circumstances I do not feel able to recommend the omission of the trap, and would recommend that the applicant be informed that on account of the use of the premises as a hospital such omission will not be approved."

The committee appointed by the Commissioners to open and schedule proposals, recently submitted a report upon the printing of the police and building regulations, which have been undergoing revision. They recommended that the contract be awarded to the National Publishing Company, and they suggested that the matter be presented to the Auditor for a decision as to what appropriation the cost should be charged to.

Commissioner Ross, in laying the matter before his associates, moved that the Auditor be asked whether the publication of the regulations could not be made the subject of an item of deficiency appropriations for the expenses of the District. The Commissioner suggested this in view of the fact that the printing of the regulations does not come under the appropriation for contingent expenses.

The Auditor, in reviewing the matter, has reported that "the Commissioners are not authorized to create a deficiency in regard to the printing of the regulations may be printed, nor does it seem necessary, in the opinion of the Auditor, that the Metropolitan Police is available for the purpose. I have the honor, therefore, to recommend that the work be done at the cost thereof be charged to this account, as there can be no question of the propriety of such an expenditure."

A few days ago John B. Taylor and twenty-four other citizens of Anacostia united in a petition to the Commissioners for a fire-alarm box to be located at or near the corner of Taylor and Jefferson Streets. The Electrical Engineer in considering the matter submitted a statement to the effect that all the fire-alarm boxes to be erected under the appropriation for the present fiscal year have been located, one of which is in Anacostia, at the corner of Sheridan and Nichols Avenues. As the location mentioned is a good one, he suggests that it be included in the next list of boxes to be made under a future appropriation.

Commissioner Macfarland has approved the report of the Electrical Engineer and has forwarded the petition to his associates with the motion that the writers be informed in accordance therewith.

The question of the refund of duplicate payments for water rent upon premises 1627 Seventh Street has been the subject of correspondence between H. F. Saul and the Commissioners. It appears that Mr. Saul claims that duplicate payments were made for the years 1899 to 1900 inclusive, but he is unable to produce the receipt for the year 1899-1900, upon which he claims a refund.

The Water Registrar took the ground that the refund cannot be properly made upon a payment for which the receipt cannot be shown. He therefore recommended that the refund for the year mentioned be not allowed.

The Auditor yesterday reported upon the application, saying: "The opinion of the Water Registrar is in harmony with the opinion of the Commissioners, which requires the production of a duplicate receipt as the basis of a refund. The refund of this money is not a matter of the house-keeping, and a refund is payable to anyone who produces duplicate receipts for a given year."

The Columbia Heights Citizens' Association recently took action relative to the change in the location of streets north of Florida Avenue and have forwarded to the Commissioners the following resolution which was adopted by them:

"Resolved, That each cross street in its course through the general subdivision of Florida Avenue should be named after a prominent person, and that the names Stoughton and Chapin, respectively, be applied to continuations westward of these streets."

Upon motion of Commissioner Bidder, the Board yesterday referred to their Attorney, for his opinion, the application of the United States Electric Lighting Company to build a four-way conduit in Lincoln Avenue from an existing pole on R Street to a point about 20 feet north of the pole. The question was raised in the Sewer Department whether the Commissioners had the right under the law to authorize the construction of the conduit, on the ground that it is not an extension or enlargement of any existing conduit.

By order of the Commissioners R. N. Bidder was appointed a commissioner in the office of the Surveyor at \$1 per day for such time as is necessary, his salary to be paid from the appropriation for the Surveyor's office.

The Commissioners yesterday authorized, through the Engineer Department, that the roadway of First Street southeast, between M and N Streets, be macadamized, at an estimated cost of \$1.50, chargeable to the current appropriation for repairs of streets.

Fought Violently Against Arrest.

Louis DeLo, colored, was fined \$5 by Judge Seaton in the United States branch of the Police Court yesterday for stealing a pair of shoes, and in default was sentenced to serve fifteen days in the District Jail. The woman was then taken before Judge Kimball in the District branch of the court, where a charge of disorderly conduct was put against her. Two policemen who took part in the arrest testified that Louis DeLo fought them violently when they took her into custody, and that she bit one of the policemen on the hand.

He was removed to the Emergency Hospital in the Third Precinct patrol wagon, while the horse was finally captured by Policemen Stanton after a long chase and turned over to a representative of Mr. Oyster.

Colored Woman Falls Down Steps.

Parthenia Morrison, a colored woman forty-two years of age, was painfully injured shortly after 7 o'clock last night by falling down the long flight of steps near the railway terminal on Thirty-second Street, between M Street and Prospect Avenue. The woman fell a distance of fourteen feet, and when picked up by citizens was in a comatose condition, but badly cut and bruised. She was taken to the Emergency Hospital, where medical treatment was given her.

Run Over by a Wagon.

Charles Richardson, colored, thirty-five years old, living at 905 N Street northwest, was knocked down and run over by a two-wheeled wagon, while crossing S Street, between Sixth and Seventh Streets. Richardson was intoxicated. While the driver called to him to get out of the street, he was not until the horse had knocked him down. Richardson's pants over the horse's hips and he was suffering great pain when found by a policeman. He was removed to Freedman's Hospital in the Eighth precinct patrol wagon. After receiving treatment at the institution he went to his home at the above number.
